

The Expello Air Products Automatic Drain Valve eliminates moisture in compressed air systems.

The valve replaces the manual drain petcock on any air tank within a vehicle's compressed air system, whether the tank is on a vehicle or trailer. The Expello valve purges water, dirt and oil from the air system in a quick, 1-second burst, every 5 minutes of vehicle on time. That means clean, dry air and an end to frozen air brakes. The 15 watt thermostatically controlled heater ensures year-round air system protection.

Fuel Additives

Performance Formula was developed by one of the premier leaders in the fuel injection equipment industry. Their 50-plus years of fuel injection system and engine experience inspired the development of fuel additives to provide the utmost protection of any fuel injection system, while simultaneously restoring the performance of the engine. Performance Formula has been developed to prevent various fuel related issues as well as keeping the engine and it's fuel injection system operating at peak performance. Performance Formula® "All Season Protection" is formulated for year-round protection where the seasonality of warm and cold weather is present.

The benefits include:

- Detergents to clean and protect the fuel system from deposits resulting in increased horsepower, torque and improved economy
- Lubricates fuel system components to help prevent wear caused by low lubricity fuels
- Cetane improver to improve combustion resulting in better starting, running and reduced engine noise
- Helps demulsify water so that the water separator can work more effectively
- Corrosion inhibitors to prevent rust/corrosion from forming on fuel system components
- Reduces smoke and particulates
- Stabilizes fuel by protecting against the formation of gums caused by oxidation
- Provides cold weather anti-gel protection by reducing the fuel pour point up to 40°F

8 oz - Treats 30 gallons  
38564P - \$ 5.99
